

DAY -12

QUESTION 1

User Authentication (Login Feature) Requirement: Write a feature file for the Login functionality.

Scenario 1: A successful login using valid credentials (`Admin` / `admin123`). Scenario 2: An unsuccessful login attempt with an invalid password. Challenge: Use a Background section to define the steps for navigating to the login page before every scenario.

CODE

```
Gherkin
Feature: Login Functionality
  Background:
    Given User launches the OrangeHRM application
    When User navigates to the login page
  Scenario: Successfully login with valid credentials
    Given User enters username "Admin"
    And User enters password "admin123"
    When User clicks on login button
    Then User should be redirected to dashboard page
  Scenario: Unsuccessful login with invalid password
    Given User enters username "Admin"
    And User enters password "wrongpassword"
    When User login clicks on login button
    Then Error message "Invalid credentials" should be displayed
```

QUESTION 2

Employee Management (PIM Scenario Outline) Requirement: Create a feature file to automate adding multiple new employees. Scenario: Add a new user in the PIM module. Challenge: Use a Scenario Outline and an Examples table to test the creation of three different employees with unique First Names and Last Names in a single execution flow.

CODE

```
Gherkin
Feature: Add Multiple Employees in PIM Module
  Background:
    Given User launches the OrangeHRM application
    And User logs in with username "Admin" and password "admin123"
    When User navigates to PIM module
  Scenario Outline: Add multiple employees
    Given User clicks on Add Employee button
    When User enters firstname "<FirstName>"
    When User enters lastname "<LasttName>"
    And User clicks on Save button
    Then Employee should be added successfully
  Examples:
    | FirstName | LasttName |
    | Pratiksha | Sahoo |
    | Ankit | Sahoo |
    | Abhaya | Sahoo |
```

QUESTION 3

3. Admin User Search (Data Tables) Requirement: Write a feature for searching existing users in the "Admin" module. Scenario: Filter users based on specific criteria. Challenge: Use a Gherkin Data Table

(Step Arguments) within a single `When` step to input multiple search parameters at once (e.g., Username, User Role, and Status).

CODE

```
Gherkin
Feature: Admin User Search
  Background:
    Given User launches the OrangeHRM application
    And User logs in with username "Admin" and password "admin123"
    When User navigates to Admin Module
  Scenario: Search user using data table
    When User searches with following details
      | Username | Admin |
      | UserRole | Admin |
      | Status   | Enabled |
    Then Matching user records should be displayed
```

QUESTION 4

Leave Application Workflow (Conditional Logic) Requirement: Create a feature for applying for "Medical Leave." Scenario: A user applies for leave and verifies the status is "Pending Approval." Challenge: Focus on the Then steps to verify multiple UI changes: the success toast message appearance and the reduction of the "Leave Balance" displayed on the screen

CODE

```
Gherkin
Feature: Leave Application Workflow
  Background:
    Given User launches the OrangeHRM application
    And User logs in with username "Admin" and password "admin123"
    When User navigates to Leave module
  Scenario: Apply Medical Leave
    Given User selects leave type "Medical"
    And User selects leave dates
    When User clicks on Apply button
    Then Success toast message should appear
    And Leave status should be displayed as "Pending Approval"
    And Leave balance should be reduced
```

QUESTION 5

Profile Update (File Upload & Tags) Requirement: Write a feature file for updating personal details in the "My Info" section. Scenario: The user changes their "Nick Name" and uploads a profile photograph. Challenge: Incorporate Tags (e.g., `@Smoke`, `@Regression`, `@Profile`) to categorize the scenarios. Include steps that handle the interaction with the file upload dialog.

CODE

```
Gherkin
@Smoke @Regression @Profile
Feature: Update Personal Details
  Background:
    Given User launches the OrangeHRM application
    And User logs in with username "Admin" and password "admin123"
    When User navigates to My info section
    @ProfilePhoto
  Scenario: Update nickname and upload profile photo
```

```
Given User updates nicknames as "Aks"  
And User uploads profile photo "C:/Users/Pratiksha/Pictures/profile.jpg"  
When User clicks on Save button  
Then Personal details should be updated successfully  
And Profile photo should be uploaded successfully
```

requirements.txt

```
selenium  
behave  
webdriver-manager  
pytest  
allure-behave
```

environment.py

```
from selenium import webdriver  
from selenium.webdriver.chrome.service import Service  
from webdriver_manager.chrome import ChromeDriverManager  
def before_all(context):  
    context.driver = webdriver.Chrome(  
        service=Service(ChromeDriverManager().install())  
    )  
    context.driver.maximize_window()  
    context.driver.implicitly_wait(10)  
def after_all(context):  
    context.driver.quit()
```

behave.ini

```
[behave]  
paths = features  
show_timings = true  
stdout_capture = false  
stderr_capture = false  
log_capture = false
```
